

THE WEB OF LIFE

Draw and color a picture with a critter
you read about in this book.

Show: what it eats
what eats it
if it helps something grow.

Add other organisms to your picture to make a web of life.

Think:

- What does it eat?
- Does it help something grow?
- Is it food for another creature?

Everything has a place
in the web of life.

Tell a partner or parent
what this means.
